

# 770ZCK Zero Clearance Kit for Valor Insert 738 Legend G3 Dimensions & Clearances

March 2014 1/1

# **Dimensions**

# **Framing**

## Clearances

### Notes:

- Although not mandatory to protect the combustible floor, we recommend that carpet, soft vinyl floor coverings, etc., not be placed within the hearth area, as these type of finishes may be damaged due to the high radiant output from the appliance.
- 2. The non-combustible material must be added after kit is installed.
- See 770ZCK installation manual for hearth requirements.
- 4. See Front or Trim installation manual for details about mantel clearances.
