

✓ VALOR WINTER CHECKLIST

With any fuel burning fireplace or space heating device, safe operation depends on your product knowledge and awareness of safe operating practices. Special precautions are necessary when small children are present.

In support of the **Hearth Patio & Barbecue Association's** consumer awareness campaign - **safefireplacetips.com** - we are sending this Safety Checklist to all of our registered Valor fireplace owners. Please take the time to review all safety procedures with your family and guests.

- **Maintain Your Fireplace.** Your owner's manual includes instructions on routine maintenance such as **glass cleaning** and **replacement of batteries** in your remote receiver and handset. Scheduling a regular maintenance check with your dealer helps to ensure safe and efficient use as well as maximizing the service life of your fireplace.

- **Please Read Your Owners Manual** and follow all instructions and warnings. Ensure that all fireplace users are aware of all features of the control system. Replacement manuals may be ordered through your dealer, or by visiting **valorfireplaces.com** and clicking the 'downloads' link. Your fireplace model number is located on the manufacturer's plate near the control valve.

- **Fireplace Surfaces**, in particular the glass viewing window, are **extremely hot during operation** (over 500°F at full capacity) and will remain hot for a period of time after the fireplace is turned off. Contact with the hot glass can cause severe burns. Close adult supervision is required if there are young children, or at-risk individuals in the house. A **physical barrier is strongly recommended**. Install an approved aftermarket safety gate to keep toddlers, young children and at-risk individuals a safe distance from the fireplace. For more information please visit **valorfireplaces.com/safety**.

- **Valor Fireplace Screen Accessories.** If your Valor fireplace is not equipped with a fire screen or screen door, a suitable accessory screen may be ordered through your local Valor dealer. To find a Valor dealer please visit **valorfireplaces.com/contact**.
- **Maintain a Safe Clearance From Hot Surfaces.** Keep furniture, draperies and other objects at least **36"** clear from the front of the fireplace. Never sit directly adjacent to the hot glass, or allow clothing or other material to come in contact with fireplace surfaces.

- **Keep the Remote Control Handset out of Reach of Children at all Times.**

A wall mount storage holster was included with your remote control package. Removing the battery from the handset or receiver will disable your remote.

- **Overheating Empty Rooms Just Doesn't Make Sense.** Heating your entire home with a central forced air system is often inefficient. Constantly pumping heat through unoccupied rooms wastes valuable energy. With your Valor, you distribute steady, even heat directly where you want it - when you want it. Studies have shown that effective zone heating can save you up to **30% on home heating costs**. Turn down your furnace and heat wisely with your Valor.

- **No Power, No Problem.** Valor Gas Fireplaces are fully functional heaters that don't require electricity (AC) for steady, efficient operation - providing reliable warmth, **even during a power failure**.
- **Valor Fireplaces are Known for Producing Radiant Heat.** Satisfying human comfort with up to **25% less energy** than warm air systems, radiant heat replaces the chill lost to cold windows and walls. Reduce your energy bill and increase your home comfort with Valor radiant heat.
- **Thank You** for taking the time to familiarize yourself with the Valor winter checklist. **Warming homes since 1890**, we take great pride in providing a safe, reliable heat source for you and your loved ones.
